Mobile Learning

Google G Suite and Office 365

Curriculum

Presentation and AV

Curriculum consultancy and training from Staffs Tech

Online Safety

Online safety is a growing concern in many schools and is now a key element of the Computing Curriculum. This is a hugely diverse area and one that is continually changing and growing. Schools will have different needs but all schools need to be aware of the issues and trends that are affecting the school community, and its learners in particular. We can support schools with:

- Audit of current practice
- Consultancy
- Policy development and advice on issues
- E-safety awareness training for staff, governors, parents and pupils
- Specialised e-safety leader training
- Online safety curriculum planning

Mobile Learning

The rise of tablet computers and mobile devices has had a huge impact on schools. The *instant-on* benefits, the swift access to internet services and the massive array of creative apps available offer enormous potential for learning, but also present unique challenges for teachers.

We can help schools with:

- Planning: Plan properly to maximise effectiveness of devices in school
- Training: Support and train teachers and leaders in best practice
- Support: Overcome technical hurdles and advise on infrastructure and device management

Google G Suite for Education

Google G Suite for Education has placed powerful cloud-based tools into the hands of teachers and pupils at minimal cost. The sheer variety and breadth of Google's offer is huge and its potential for education is equally exciting.

Whether you are using Google G Suite with Chromebooks, or through your existing hardware, we can help teachers and pupils get up and running quickly with essential features, ideas and activities designed for education.

We can show you how to

- Use Google Classroom to shorten feedback loops
- Use sharing and commenting to revolutionise assessment and feedback
- Encourage independent and collaborative learning

Microsoft Office 365

Most teachers and students use Microsoft Office in some form or another so moving to Office 365 is a natural way to keep consistency and familiarity whilst moving to cloud based services.

Office 365 represents a powerful suite of tools that staff and pupils can use any time, anywhere and on any device.

We can help you:

- Get to grips with using Office 365
- Use the power of the cloud to share and collaborate on documents
- Create a virtual workspace to transform learning

Computing Curriculum

Many primary schools are still facing the challenge of implementing the Computing Curriculum into their planning. We help schools to understand how to make the move from ICT to Computing, and help them to explore how this curriculum can be taught from Reception to Year 6. Our support gives teachers the confidence to deliver this curriculum and to recognise the benefits it will bring to pupils.

We can provide:

- Help with planning from Reception to Year 6
- Training and advice on the key features of the computing curriculum
- One to one support with staff to help them implement the curriculum into their long term plans
- Training and advice on how the iPad can be used to support programming lessons
- Support and guidance on key software and resources to use in the classroom

Presentation and Audio Visual

Effective use of interactive displays such as whiteboards, screens and projectors is the key to making a positive impact on teaching and learning, and ultimately raising standards. Too many interactive displays are used as little more than a glorified projection screen, which fails to create an inspiring learning environment or motivate pupils. We offer workshops for all brands and models of interactive display.

We offer training on

- Interactive whiteboards, projectors and displays
- Learner response and voting systems
- iPads and tablets
- Visualisers

What next?

Whether you are looking to develop a CPD programme, access consultancy or book a training event we can help.

Can you help me build a CPD Programme?

If you wish to discuss a CPD Programme we will provide a free, no obligation consultancy visit from one of our team to help you choose a provision that is tailored to your needs and budget.

How do I get started?

Just contact us—we'll work with you to do the rest.
